Multi Sample Homogenizer

Cat. No. 15515799

- » DNA/RNA extraction
- » Tissue homogenization
- » Enzyme isolation
- » Protein purification

The Fisher Scientific Bead Mill 24 is the most advanced and powerful bead mill homogenizer available. It is designed for grinding, lysing, and homogenizing biological samples prior to molecular extraction. The Bead Mill 24's unique tube carriage motion coupled with sample specific bead beating materials ensure that a thorough homogenate is achieved regardless of sample type. The high lysing efficiency of the Bead Mill 24 results in an increase in nucleic acid, protein and small molecule yields and increases the sensitivity of the downstream assay.

Bead Mill 24 includes a 2 mL Tube Carriage Kit.

- » Compatible with 24 x 2 mL or 24 x 0.5 mL skirted tubes
- » Includes 24 place tube carriage and Bead Mill Finger Plate that holds the 2 mL tubes firmly in place during processing.
