Kardex VCM Box

Kardex VCM Box Base

The base is the most important component, as all other frames and dividers are based up on it.

The Kardex VCM Box, tailor-made for the Vertical Carousel Module (VCM), ensures a flexible, customized, and organized storage solution. It is available either with a width of 200 mm or 400 mm, each with a depth of 425 mm, 525 mm or 625 mm. The base can be adjusted with different frames and dividers to create individual storage locations for various items. Fixed label holders are already integrated in the front area.

With an ergonomically shaped handle and a slight elevation in the longitudinal direction at the bottom of the box, the Kardex VCM Box can quickly and comfortably pull out of the carrier and push back in smoothly. The two bars in the front area of the box are specifically there to utilize the full depth of the carrier. The bars prevent the box from slipping over the carrier. Thanks to a slight incline in the lower area of these bars, it is also possible to pull the box ergonomically and easily over the front lip of the carrier.

Unique frame system

The Kardex VCM Box is recognized by its frame concept. The unique and innovative Kardex EasyClick system allows for building the Kardex VCM Box base to different heights and continuously adapts to maximize the box volume.

The Kardex VCM Box is a highly flexible option that will adapt to your future needs since it is possible to change its height by adding or reducing frames.

Flexible
and scalable
box system

Optimally
adapts to the
customer's
needs

Effective
use of available
storage space

Flexible divider system

The Kardex VCM Boxes flexibly divide and quickly adapt at any time by using cross and longitudinal dividers. The individual divider concept creates different combinations in order to reach the desired height.

This creates individual storage locations, enhances the flexibility as well as scalability of the box to deliver a complete storage and classification system, and further ensures maximum storage volume and high-density storage.

Smart plug-in with EasyClick system

Environmentally friendly

Highly-flexible height, width, and depth

Also available
as ESD-
Version

1 Base

The base is the most important unit in the Kardex VCM Box concept, as all other frames and dividers are based up on it.

2 Frame

With an EasyClick system, the frames can be placed on the base and plugged into each other to adjust the height of the box quickly and flexibly.

3 Divider

This concept further increases the flexibility of the box to provide a comprehensive storage and classification system for the Vertical Carousel Module.
